Demo test accounts

Dummy credentials for testing the Charter Mission admin console and member app on your own machine or a staging server.

Dummy data only. Every account uses the same public password, and the staff accounts use published two-step keys. The seed refuses to run with `NODE_ENV=production`, and the keys are only set outside production. Never create these accounts on the live site.

Admin console	`http://localhost:3001`
Member app	`http://localhost:3000`
Password (all accounts)	**`CharterMission@123`**
Two-step code	**Mandatory for every staff account**, in the admin console and the member app: 6 digits from an authenticator app (setup keys and QR codes on page 2). Member accounts don't need one.

Staff accounts (admin console)

Role	Name	Email	What they can do
Super Admin	Super Admin	`admin@chartermission.com`	Everything a Platform Admin can do, plus granting the Platform Admin and Super Admin roles.
Platform Admin	Platform Admin	`platform-admin@chartermission.com`	Moderation, appeals, trending and its rules, events (review, publish, feature, manage), courses, Ambassadors in every country, Ambassador team (manager accounts and required training), Media settings, audit log and CSV export, announcements.
Moderator	Moderator	`moderator@chartermission.com`	Reports queue, hide/remove, warn, restrict and suspend, appeals, trending pins and suppressions, events review, audit log (view only). No settings, courses or Ambassadors.
Ambassador Manager	Ambassador Manager	`amb-manager@chartermission.com`	Ambassadors only, for **Nigeria, Ghana and Kenya**: add leads, move them through the pipeline, onboarding, certification. Leads in other countries (e.g. Senegal) are invisible.

Signing in with a staff account

1. Go to `http://localhost:3001` and sign in with the email and the password above.
2. When asked for a code, open your authenticator app (Google Authenticator, Microsoft Authenticator, 1Password, Authy…).
3. Add the account once: scan its QR code on page 2, or choose "enter a setup key" and type the key shown (spaces don't matter, time-based).
4. Type the 6-digit code the app shows. Codes change every 30 seconds and each code works once.
5. Signing in to the member app with a staff account asks for a code too.

Two-step verification setup keys

One entry per staff account. Scan the QR code with your authenticator app, or type the setup key. Testers can share an account: everyone who adds the key sees the same codes.

Super Admin

Super Admin

`admin@chartermission.com`

Setup key

`W7OF G7TC EOBQ REHY NCYL BZYB CLCJ B7DS`

Type: time-based (TOTP) · 6 digits · 30 seconds · SHA-1

Type: time-based (TOTP) · 6 digits · 30 seconds · SHA-1

Already set up two-step verification on one of these accounts yourself? The seed leaves it alone, so your own authenticator entry keeps working and these keys won't. To start over with these keys, reset the local database (see Creating or resetting the accounts, at the end).

Member app accounts

Sign in at the member app with the same password. These accounts can't open the admin console.

Name	Email	Use it to test
Amara Okafor	`amara@example.com`	Founding Ambassador for Nigeria (badge on profile, posts and comments). Verified member.
Kofi Asante	`kofi@example.com`	Ambassador onboarding (Ghana). Open **/ambassadors** to see the checklist and sign the agreement.
Zainab Abdi	`zainab@example.com`	Ambassador applicant (Kenya), waiting for review.
Kwame Mensah	`kwame@example.com`	Verified member (Ghana). Try nominating someone or applying.
Wanjiru Kamau	`wanjiru@example.com`	Regular member (Kenya). Good for reporting posts and stories.
Owais Iqbal	`owais@example.com`	Follows Amara, Kwame, Wanjiru and Leila: their live stories fill his stories strip. Busy feed.
Easy Profits Hub	`promo@example.com`	Spam account whose post, comment, story and profile are reported. Sign in to see what an actioned author sees.

More members are seeded (Aisha, Chinedu, Leila, Thabo, Fatou, Yohannes, Tunde, Ngozi…): all use `firstname@example.com` and the same password.

What to test

Ambassador Manager (amb-manager@chartermission.com)

- Ambassadors opens straight away; Moderation, Trending, Courses and settings are not in the sidebar.
- Leads from Nigeria, Ghana and Kenya only: Moussa Sow (Senegal) is missing, and opening his lead link shows "not found".
- Move Kwesi Boateng from Interview to Decision, then Onboarding: the checklist starts and an invite email is logged.
- Edit a lead and clear a field (e.g. organisation); add a note; score the rubric.

Platform Admin (platform-admin@chartermission.com)

- Ambassadors shows every country, including Moussa Sow. Ambassador team: add a manager, change their countries, revoke.
- Certify a lead once its checklist is complete; on Amara's lead try "End term" (Alumni keeps a grey badge).
- Media settings: change the post and story video limits; check the change in the Audit log.
- Courses, Events review and Trending rules.

Moderator (moderator@chartermission.com)

- The queue starts with reports against Easy Profits Hub: a scam post (two reports), a harassing comment on Amara's post, a scam story and an impersonation report on the profile.
- Act on them (hide, remove, warn, restrict, suspend); report something new from a member account and watch it arrive.
- Hide a story: it disappears from the strip; the author still sees it with a notice. Restore it.
- A scam opportunity ("Remote Data Entry: Earn $500 Daily") is reported twice: remove it and check it disappears from /opportunities.
- Appeals: appeal the action from the member's Settings → Moderation, then decide it here.

Two-step verification

- Sign in to the member app (localhost:3000) with any staff account: it asks for the code before the feed opens.
- Settings → Security on a staff account: two-step verification can't be turned off.
- Ambassador team (Platform Admin): add a new manager; their first sign-in, in either app, makes them set up an authenticator.

Member app

- Kofi: open /ambassadors and sign the agreement; in the admin console the Agreement step is ticked.
- Amara: the Ambassador badge shows next to her name; her profile has a "Lagos meetups" highlight, and her archive has one more story to build a new highlight from.
- Owais: the stories strip shows four members with new stories; Leila's and Kwame's recent posts show YouTube players.
- Post a video (upload and a YouTube link) and a story; add the story to a highlight on your profile.

Chapters, events and opportunities

- Open Chapters → Nigeria Chapter: Amara is on the chapter team and two posts are pinned. As Amara, pin or unpin a post from its menu (three at most) and edit the About tab.
- As Amara, Host an event: "Nigeria Chapter" is offered as the host. Any verified member can now propose an event; it goes to the Events review queue.
- Opportunities: eight listings are seeded. As Owais, apply to one with a note; two are already saved under My opportunities → Saved.
- As Kwame (PayBridge designer listing): Review applicants, shortlist or accept one with a message; the applicant gets a notification.
- Post a new opportunity: it is live straight away. Report someone else's listing from its page.

Seeded Ambassador leads

Lead	Country	Stage	Owner
Amara Okafor	Nigeria	Ambassador (Founding)	Amb. Manager
Kofi Asante	Ghana	Onboarding	Amb. Manager
Zainab Abdi	Kenya	New (applied)	—
Ifeoma Nwosu	Nigeria	Screening	Amb. Manager
Kwesi Boateng	Ghana	Interview	Amb. Manager
Efua Mensah	Ghana	New (nominated)	—
Samuel Okoro	Nigeria	Declined	Amb. Manager
Achieng Otieno	Kenya	Review	Amb. Manager
Grace Wanjiku	Kenya	Talent pool	Amb. Manager
Moussa Sow	Senegal	Decision	Platform Admin

Creating or resetting the accounts

Re-create the local database with these accounts. **This deletes all local data** (posts, uploads records, accounts you made yourself):

```
cd "/Users/owaisiqbal/Documents/Claude/Projects/Charter Mission/chartermission"
pnpm --filter @chartermission/api db:migrate
pnpm --filter @chartermission/api db:reset
```

Or add any missing accounts and keep existing data (staff accounts that already set up two-step verification keep their own key):

```
cd "/Users/owaisiqbal/Documents/Claude/Projects/Charter Mission/chartermission"
pnpm --filter @chartermission/api db:seed
```

Emails (invites, password resets) are not sent locally: they are listed at `http://localhost:4000/api/v1/dev/mailbox?to=<email>`.
